

InterCity 225 Fleet List – Class 91 Locomotives

A total of 31 Class 91 locomotives were built by British Rail Engineering Limited (BREL) at Crewe Works from 1988 until 1991 and were numbered 91001 to 91031. They were overhauled by Bombardier at Doncaster between 2000 and 2003 when most had 100 added to their number. The only exception was 91023, which became 91132 due to its involvement in the fatal accidents at Hatfield in 2000 and Great Heck in 2001. All the locomotives have spent most of their lives working on the East Coast Mainline (ECML) as part of the InterCity 225 sets. The following table contains information about each one, including when they were introduced, the names they have carried and their current status.

InterCity 225 Fleet List – Class 91 Locomotives

General Notes

The dates of introduction are when each locomotive was officially handed over to InterCity

91110 carries a special black and grey livery celebrating the Royal Air Force (RAF) Battle of Britain Memorial Flight. This locomotive also has a plaque commemorating the record speed of 162 miles per hour it attained on a test run on 17th September 1989

91111 carries a special livery marking the contribution and sacrifices made by various regiments of the armed forces along the East Coast Mainline (ECML) during the First World War. The locomotive nameplate features crests of these regiments and the vinyls show several images commemorating their involvement in the war effort

91119 carries British Rail InterCity livery. This was the first livery worn by the class 91 locomotives and it was re-applied to 91119 in November 2018 to celebrate 30 years' service on the ECML

91120 is on long-term loan from Europhoenix to the Crewe Heritage Centre for display at the museum
